

How cells obtain energy

Complete the puzzle using the clues shown below.

Across

2. the ability to do work or cause change
6. location of photosynthesis in plant cells
7. one of the two byproducts of fermentation
8. foodmaking process in plants and other organisms that uses sunlight
9. process by which a cell releases energy from food without using oxygen
10. food produced by the chloroplasts

Down

1. process that breaks glucose down into hydrogen and carbon molecules
3. location of cellular respiration
4. simple type of sugar
5. one of the two byproducts of fermentation
